

## MILBANK ELECTRIC VEHICLE CHARGING STATIONS COMING SOON!

Get on board the electric vehicle (EV) revolution with Milbank electric refueling stations by AeroVironment, the leader in EV charging. Our state-of-the-art charging stations have been featured in the New York Times, Forbes, Fast Company and ABC-TV – and we're here to help usher your customers and their end-users into the EV future.

We have the broadest line of solutions for a variety of customers who need EV charging solutions now. Utilities, contractors, developers, business customers and consumer end-users can choose the system that best suits them from our initial range of products – designed to offer a charging solution for a wide array of EV refueling scenarios.

### Planned for launch:

#### Home and Commercial Charging Dock (MEVSE-RS)

Supporting the most common charging regimen – at home, overnight, also appropriate for commercial charging

#### Dual and Quad Dock (MEVSE-RS Dual and Quad)

Ideal for apartments, condos and high-traffic commercial parking lots

#### Smart Charging Dock (MEVSE-RS+)

All configurations of the Charging Dock with the addition of a smart communication module are ideal for supporting the Smart Grid with options for connectivity with GPRS and point of sale payment

... And ask us about our Level 3 DC Fast Charging solutions – designed to refuel EVs in minutes, not hours

### LAUNCH DETAILS:

Product Availability and Training:	February 2011
More information:	877.483.5314

#### ABOUT AEROVIRONMENT, MILBANK'S EV CHARGING PARTNER

Milbank is proud to partner with AeroVironment, a company that has been innovating in the EV space for more than 20 years. The original co-developer of the GM Impact, the world's first modern electric car, AeroVironment is a leader in commercial and industrial fast charging with more than 10,000 fast charging stations deployed in the US and around the world.
